## **Abstracts**

Global Freight Trucking Market is valued at approximately USD 2732 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.1% over the forecast period 2022-2029. Freight Trucking refers to application of heavy-duty trucks for the transportation of shipments such as goods, commodities etc. from one location to another. Freight trucks are modified for efficient transportation of bulk shipments. These trucks are also equipped with an integrated refrigeration system to facilitate transportation of temperature-sensitive cargo. The rising expansion of E-commerce sector worldwide and increasing utilization of telematics in automobiles as well as strategic initiatives from leading market players are key factors accelerating the market growth.

According to Statista - In 2021, global retail e-commerce sales estimated at USD 4900 billion, and the market is projected to grow by around 50 percent to reach USD 7400 billion by 2025. Moreover, as per India Brand Equity Foundation (IBEF) – as of 2022, Indian e-commerce market is valued at USD 74.8 billion. Furthermore, as per projections, India's e-commerce market would grow to USD 111 billion by 2024 and further to USD 200 billion by 2026. Also, rising urbanization in developing regions coupled with growing expansion of logistics & transportation sector would create lucrative growth prospectus for the market over the forecast period. However, high cost

associated with Freight Trucking stifles market growth throughout the forecast period of 2022-2029.
