## **Abstracts**

Global Front forks Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Front forks are part of structure of motorbike which connects front wheel with rest of frame of bike. Forks also features mounting for breaks and suspension systems. These forks are largely available in three types such as Telescopic front forks, Cantilever front forks, and Inverted cantilever front forks among others. Growing adoption of motorcycles and increasing application of front forks in different types of bikes like scooter, mopeds, and cruiser etc. are driving the growth of Front Forks Market. For instance, according to Statista - In 2020, the revenue of the global motorcycle industry was estimated at USD 117 billion is estimated to grow to around USD 160 billion by 2025. Moreover, rising partnership activities for development of E-bikes are driving the demand for front forks. For instance, in December 2021, Harley-Davidson entered into a partnership with Taiwanese manufacturer Kwang Yang Motor Co Ltd (KYMCO) to develop electric motorcycles. Under this partnership KYMCO agreed to invest USD 100 million into Harley-Davidson's electric motorcycle division LiveWire, and AEA-Bridges Impact Corp (ABIC). Also, growing traffic congestion in developing countries and increasing consumer inclination towards two wheelers are

likely to offer lucrative growth opportunities for Front Forks Market in the forecasted period. However, Low penetration of high end two wheelers in emerging markets and volatile cost of raw materials impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Front Forks Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing penetration of electric bikes and presence of leading market players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as growing trend of motorcycle tours, and presence of the leading market players in the region, would create lucrative growth prospects for the Front Forks Market across the Asia Pacific region.
