Abstracts

Global Fumigation Service Market is valued at approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Fumigation is a practice of pest control, wherein pests are killed by suffocating them with the help of poisonous gas. The space to be fumigated is first sealed to ensure that there are lesser chances for the exchange of air which could reduce the effect of the chemicals used. Fumigation can be carried out in buildings, agricultural lands, warehouses for storage of grains, etc. The expanding medical problems with lifestyle changes and exponential rise in population has led to the adoption of Fumigation Services across the forecast period. For Instance: as per the UN's 2019 revision of the World Population Prospects (WPP), the United Nations projected that the world's population would grow from 7.7 billion in 2019 to reach 8.5 billion in 2030, 9.7 billion in 2050, and 10.9 billion in 2100. Also, with the rising awareness among the public, the adoption & demand for Fumigation Services is likely to increase the market growth during the forecast period. However, government regulations impede the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Fumigation Service market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world in terms of market share owing to the rise in the growth rate of various cereals and grains in the European countries. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as emerging economies like India and China primarily due to the change in lifestyle of the local population would create lucrative growth prospects for the

Fumigation Service market across Asia-Pacific region.
