Global Gait Trainer Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Gait trainers are used for physically disabled patients to improve walking ability. A gait trainer offers both unweighting support (make walking and standing easier and more comfortable) and postural alignment to enable gait practice. Growing incidences of spinal injuries and rising technological advancements in healthcare industry are key drivers for the growth of Gait Trainer market. For instance, according to the National Spinal Cord Injury Association, as of 2020 approximately 450,000 people in the United States are living with a spinal cord injury (SCI) and every year, an estimated 17,000 new SCIs occur in the U.S. Furthermore, Centers for Diseases Control and Prevention (CDC), Spinal Cord Injury costs the nation an estimated USD 9.7 billion each year. Also, with the increasing geriatric population and rising healthcare expenditure, the adoption & demand for Gait Trainer is likely to increase the market growth during the forecast period. However, high product cost and supply chain disruption due to pandemic impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Gait Trainer Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to increasing
