Abstracts

Global Galactoligosaccharides Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Galacto-oligosaccharides is prebiotics which are made up of chains of the plant sugars. Legumes, dairy products, and some root vegetables contain them. In the intestine, prebiotics provide nourishment for 'healthy' bacteria. The increasing value of Galactoligosaccharides and increased use of Galactoligosaccharides has led the adoption of Galactoligosaccharides across the forecast period. For Instance: as per the data of Statista, in Latin America the market value of Galactoligosaccharides is predicted to increased from 126.81 in 2018 to 200 in the year 2030. Also, in the projected period of 2020 to 2027, research and, the adoption & demand for Galactoligosaccharides is likely to increase the market growth during the forecast period. However, the rise of galactooligosaccharide substitutes is projected to stifle market expansion.

The key regions considered for the global Galactoligosaccharides Market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world in terms of market share owing to the a greater

emphasis on purity and GOS research to fulfil the needs of premium applications, which will open up new, lucrative opportunities in the next years. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as a result of increased consumer knowledge of prebiotics and the development of plant-based GOS variations would create lucrative growth prospects for the Galactoligosaccharides Market across Asia-Pacific region.
