Global Gas Chromatography Market is valued approximately USD 2.7 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 4.1 % over the forecast period 2020-2027. GC is used for testing purity of substances, separating the components in a mixture, which are capable of vaporizing without undergoing decomposition. Gas chromatography is used for preparing pure compounds from mixtures, and identifying the compounds. Gas chromatography are used in forensic science for biological specimens, and crime-scene evidences. It also tests the quality of chemical products and measuring toxicity of substances. The global Gas Chromatography is being highly demanded due to the coronavirus pandemic owing to the increasing use of chromatography techniques in the approval of various drugs. In

addition, increasing crude & shale oil production, collaborations between chromatography instrument manufacturers and research laboratories/academic institutes, rising adoption of GC-MS, development of policies and initiatives to reduce environmental pollution levels, rising food safety concerns and growing importance of chromatography tests in the drug approval process are the few factors responsible for growth of the market over the forecast period. Furthermore, the rising advancements and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 04th February 2019, Agilent Technologies Inc. launched two new gas chromatography (GC) named- Agilent 8890 and 8860 GC systems, that incorporates innovative and intelligent 'self-aware' predictive technology, thus expanding product portfolio of robust analytical instruments. Whereas, high cost of gas chromatography equipment is the major factor restraining the growth of global Gas Chromatography market during the forecast period.

The regional analysis of global Gas Chromatography market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world owing to the increase in R&D funding, cannabis research, market for shale oil and gas, and food and agricultural industry. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
