Abstracts

Global Gas Equipment is valued approximately USD 59.3 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 6.82% over the forecast period 2019-2026. Gas equipment helps to measure gas pressure, gas level, and detects the presence of harmful gases in the surroundings. The medical gas equipment seems to be a tremendous growth due to the increasing prevalence of infectious diseases, and the growing awareness towards this dangerous deceases. Growing influence of home healthcare facilities that provide improved convenience for various respiratory diseases will also help to drive the gas equipment market. Gas detector is equipment used mostly as a part of safety system for detecting presence and leak of various gases in a consigned area, which lead to increase the growth of gas equipment market globally. The increasing adoption of gas detectors due to growing operations of shale gas exploration and increasing demand for safety purposes is expected to drive the growth of gas equipment market over the forecast period of 2019-2026.

The regional analysis of global Gas Equipment is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World.
