Abstracts

Global Gauze Swabs Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Gauze Swabs is a material mainly made with cotton and utilized for cleaning and washing of wounds arising due to injuries and chronic infections. It can also be used for padding, protection, blood spill, wound dressing, and for applying antiseptic on the skin among others. Gauze Swabs are available in Sterile and non-sterile formats. The increasing number of surgeries & injuries due to chronic diseases and growing number of geriatric individuals as well as strategic initiatives from leading market players are key factors accelerating the market growth.

According to the World Health Organization (WHO) estimates - as of 2022, every year around 41 million people worldwide lost their lives due to Noncommunicable diseases, witnessing for around 74% of all global deaths. In addition, every year 17 million people die from a NCD aged below 70 years. Furthermore, 86% of these premature deaths occurs in low- and middle-income countries. Also, rising prevalence of chronic infections & diabetic wounds and growing healthcare infrastructure in emerging markets would create lucrative opportunities for the market over the forecast period. However, high cost associated with dressings and lack of reimbursement policies in developing regions impede the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Gauze Swabs Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region in terms of market share due to factors such as presence of leading

market players as well as increasing prevalence of chronic infectious diseases in the region. Whereas Asia Pacific is expected to grow significantly during the forecast period, owing to factors such as rising incidences of injuries & chronic infections as well as growing number of geriatric individuals in the region.
