## **Abstracts**

Global Glass-ionomer Cement Market is valued approximately USD 99.60 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6.50 % over the forecast period 2020-2027. Glass ionomer is primarily used as a cement in the field of dentistry due to its biocompatible nature. These glass-ionomer cements are based on the reaction of silicate glass-powder and polyacrylic acid, an ionomer. Also, the dentists make sure to follow the manufacturer's direction of each type of cement in terms of mixing, using the correct ratio and subjecting it to the correct temperatures. Presently, considerable efforts have been made by the glass ionomer cement manufacturers to improve the mechanical properties of traditional glass ionomer. As a result, the key players are focusing on strategies such as product launch, innovation and merger & acquisition to sustain themselves amidst fierce competition. Growing interest in the application of bioactive materials along with the increase in focus on dental esthetics would drive the growth of the market during the forecast period of 2020-2027. As glass ionomer cement is widely preferred as a restorative material for anterior restorations owing to its biological characteristics and favorable esthetic. Thus, the demand for glass ionomer cement would increase thereby, aiding the growth of the market. However, availability of cost-effective substitutes is hampering the growth of the market during the forecast period of 2020-2027.

The regional analysis of global Glass-ionomer Cement market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region due to the well-established healthcare infrastructure and increase in focus on dental esthetics. Whereas Asia-

Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
