Abstracts

Global Glass Packaging Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Recyclability and neutral reacting ability of glass make it a popular choice in packaging applications. Glass packaging comprises all packaging formats made from glass such as jars, bottles, containers, and others. Growth in end-user industries such as pharmaceuticals, cosmetics, food products and others is mainly fueling the market demand. Such as, according to Statista, the worldwide revenue of pharmaceutical market increased from USD 1250 billion in 2019 to USD 1265 billion in 2020. Similarly, global cosmetics industry revenue surged from USD 72.36 billion in 2020 to USD 80.73 billion in 2021 and is expected to reach USD 131.04 billion by 2026. Additionally, rising consumer demand for safe and healthier packaging is injecting growth into the market. Furthermore, introduction of lightweight glass and developments in glass recycling are the factors anticipated to further push the market towards growth. In August 2021 Owens-Illinois James City County signed a partnership agreement to bring Glass recycling to the county, which will benefit local charities. However, growing demand for plastic as a packaging material is expected to hamper the future growth of the market.

The key regions considered for the Global Glass Packaging Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World.
