Abstracts

Global Glucosamine Market is valued approximately USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Glucosamine is a popular supplement for treating osteoarthritis in the knees. Thus, it is mostly used for the people having problems in the knees, ligaments, knee caps and lack of knee liquid making capacity. Increasing prevalence of arthritis cases worldwide and increase in the number of obese populations are factors contributing to the market growth. For instance: according to United Nations, Department of Economic and Social Affairs, in 2019, the world's population of people 65 years or above totaled 703 million. In 2050, the number of elderly people is expected to increase to 1.5 billion. Thus, with an increase in the aged people worldwide, the demand for the Glucosamine is expected to rise in the near future. However, Lack of supply of raw materials and lack of transparency and supervision in the supply chain impedes the growth of the market over the forecast period of 2021-2027. Also, increasing number of geriatric populations and increasing shift towards inactive lifestyle is likely to increase the growth of the market in the forecasting period.

The regional analysis of global Glucosamine market includes Asia Pacific, North America, Europe, Latin America and Rest of the World for analysis and estimation, North America is the significant region in terms of largest market share, across the world owing to increasing use of nutritional supplements Whereas, Europe is anticipated to exhibit highest growth rate over the forecast period 2021-2027.
