Abstracts

Global Gluten-free Baking Mixes Market is valued at approximately USD 420.43 million in 2021 and is anticipated to grow with a healthy growth rate of more than 7.5% over the forecast period 2022-2029. Gluten-free baking mixes are a mixed formulation of ingredients used for the cooking of baked goods that do not contain gluten-containing ingredients. The growing consumption of bakery foods, rising demand for convenient healthy food items, coupled with the high demand among health consciousness, especially among millennials and Gen Z, are attributing to the market growth across the globe.

The high prevalence of celiac disease and Irritable Bowel Syndrome (IBS) is the key factor that are propelling market growth across the globe. About IBS reported that it was estimated that there were approximately 5-10% of the global population is affected by IBS, in which 35% to 40% are male and 60% to 65% of individuals female, along with most people are under the age of 50. Thereby, the growing incidences of IBS are fueling the demand for gluten-free baking mixes, which, in turn, accelerates market growth. Moreover, growing awareness about gluten-free baking mixes among the population, as well as the increasing investment by the leading market players are offering various growth prospects to the market over the forecasting years. However, the volatility in the prices of raw materials is challenging the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Gluten-free Baking Mixes Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the market in terms of revenue, owing to the increasing prevalence of celiac diseases and rising awareness about the side effects of gluten on health. Whereas, the Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as the rising preference towards healthy lifestyle among consumers, increase in the cases of allergic diseases, as well as rising demand for healthy food items in the regional market.
