Abstracts

Global Glycidyl Methacrylate Market is valued approximately USD 149.53 Million in 2019 and is anticipated to grow with a healthy growth rate of more than 9.80% over the forecast period 2020-2027. Glycidyl methacrylate is an ester of methacrylic acid and glycidol which is common monomer that is used in the production of epoxy resins. It is ideally suited for coating and resin applications due to its high purity and dual monomer functionality. Also, it provides epoxy functionalization to polyolefins and other acrylate resins as epoxies contain diglycidyl ether of bisphenol A, which efficiently favors its application in polymer and adhesives industry. The product growth is expected to slow down in the upcoming period due to the global pandemic of COVID-19, where lockdowns in various economies results in shut down of manufacturing units of different end use industries. This product is routinely used with other monomers for producing polymers with high hardness, strength, water, solvent, and thermal resistance. Therefore, rapid growth in plastic industry and prominent application of Glycidyl methacrylate in it, is expected to drive the growth of market over the forecast years. For instance: as per Plasticseurope.org, the global production of Plastic was 348 million tonnes in 2017 which is increased with 359 million tonnes in 2018. Thus, lucrative growth in plastic industries is expected to drive the growth of marker over the forecast years. In addition, demand for adhesives & sealants to fulfil the growing packaging requirements of food & beverage and e-commerce industries is also likely to accelerate the growth of global market. However, stringent government regulation on the use, sale and labelling of the product is the factor hampering the growth of market.

The regional analysis of global Glycidyl Methacrylate market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the rapid growth in demand of Glycidyl Methacrylate in packaging and e-commerce industries. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rapid growth in plastics and adhesive industries across the region would create lucrative growth prospects for the Glycidyl Methacrylate market across Asia-Pacific region.
