Abstracts

Global Glycol Ether Market is valued at approximately USD 6.88 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.90 % over the forecast period 2022-2028. Glycol Ethers are a class of solvents that are composed of ethylene glycol or propylene glycol alkyl ethers that are extensively used in paints and cleansers. These solvents often have a greater boiling point, as well as the beneficial solvent characteristics of ethers and alcohols with smaller molecular weights. Rising application of Glycol Ethers in paints & coatings, expanding pharmaceutical, cosmetic, and skincare industries and rising demand from construction industry has driven the adoption of Glycol Ether across the projected period. For Instance: As per the reports of the World Bank, construction industry spending has increased by 4.2 percent in 2020 compared to 2019, which will eventually result in a rise in demand for Glycol Ether. Also, rising investment for the expansion of the Market is most likely to boost the overall growth of the Glycol Ether Market. However, health risks associated with Glycol Ether and high cost price of the raw materials can obstruct the Market's expansion over the projection period of 2022-2028.

The key regions considered for the Global Glycol Ether Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world. Rising construction and renovation project is driving the Market growth in North America. Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. The Market is expected to grow

during the projected period, due to the presence of highly populated countries and rising investments in construction projects.
