Abstracts

Global Goat Milk Yogurt Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Goat Milk Yogurt contains low level of lactose. It is often a healthy alternative for those who have cow milk allergies. Goat milk yogurt is the most excellent source of calcium and protein. The high government support has led the adoption of Goat Milk Yogurt across the forecast period. For instance, the government of India provides 25 to 30 per cent subsidy on the total cost of the goat farm which gives farmer slight motivation to increase the production for the goat milk. Similarly, European government is also providing allowances of about 80 European Currency Unit (ECU) for almost half/full year for the landscape maintenance of goat farms which is fueling the market for the goat milk yogurt. Also, with the rise in consumer preference for the goat milk, the adoption & demand for Goat Milk Yogurt is likely to increase the market growth during the forecast period. However, rise in the occurrence of lactose intolerance in the consumer impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Goat Milk Yogurt market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the significant region across the world in terms of market share owing to the well-developed food and beverage industry in the region and people are more aware about the healthy

food. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as increase in population and rise in demand for western dairy food products such as natural snacks and fermented dairy products would create lucrative growth prospects for the Goat Milk Yogurt market across Asia-Pacific region.
