Abstracts

Global Gourmet Salts Market is valued approximately at USD 1.38 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 6.3% over the forecast period 2021-2027. Gourmet salts are the unrefined salts that have been gaining popularity among culinary applications, and health-conscious consumers as they contain less sodium & high minerals. They are used to enhance the texture, nutrients, and taste of the food. They are used as a taste enhancement agent for the food products. The global Gourmet Salts market is being driven by growing frozen food products demand worldwide as this type of salt is beneficial in preserving the food & extending the shelf life of food products. According to Statista, the frozen food market increased from USD 260.8 Billion in 2018 to USD 272.11 Billion in 2019 and is expected to grow steadily and reach USD 366.3 Billion by 2026. The rising adoption of natural products is acting as a driving factor for the market growth as gourmet salts are manufactured through a process which does not affect their nutrient content. They are produced through quick vacuum evaporation process or open-air solar evaporation. Furthermore, growth of e-commerce, increasing demand for seasoning & salts to enhance food taste and large production of salt globally will provide new opportunities for the global Gourmet Salts industry. However, high cost of products and lack of awareness regarding the availability of Gourmet Salts may impede market growth over the forecast period of 2021-2027.

The key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global Gourmet Salts

Market. Europe is the leading region across the world in terms of market share due to developed food industry, increasing health-conscious consumers and presence of large food companies in the region. Whereas North America is anticipated to exhibit the highest growth rate over the forecast period 2021-2027 owing to availability of multi-cuisine culture, rising disposable income and increasing awareness among consumers.
