Abstracts

Global Granola Bars Market is valued approximately USD 4.27 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.50% over the forecast period 2022-2029. Granola Bars is a snack bar and made using a mixture of oats and other ingredients (such as brown sugar, raisins, coconut, and nuts among others). Moreover, other organic ingredients including raisins and dates, and dark chocolate are also used in granola bars. Granola bars are intended to be eaten as breakfast and snack food. The increasing demand for snack bars and growth in sedentary lifestyle are key factors accelerating the market growth.

The increasing demand for functional bars and snacks is contributing to the growth of the Global Granola Bars Market. For instance, according to Statista – in 2020, around 44.51 million Americans consumed energy / diet snacks and bars, and this number is projected to grow to 45.27 million in 2024. Furthermore, as per Statista – in 2021, the global healthy snacks market was valued at USD 85.6 billion, and the market is projected to grow at a rate of 6.6 percent annually between 2022 and 2030 to reach to USD 152.3 billion by 2030. Also, rising number of health-conscious individuals and increasing demand for cereal-based bars would create lucrative growth prospectus for the market over the forecast period. However, lack of awareness in developing regions stifles the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Granola Bars Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the presence of leading market players and increasing demand for functional snacks & bars in the region. Whereas Asia Pacific is expected to grow with a highest CAGR during the forecast period, owing to factors such as rising consumption of functional food & beverages and increasing penetration of leading market players in the region.

Major market player included in this report are:
