## **Abstracts**

Global Graphene Battery Market is valued approximately USD 57.5 million in 2019 and is anticipated to grow with a healthy growth rate of more than 23.9% over the forecast period 2020-2026. Graphene is an effective conductor, containing features of lightweight, and highly flexible with a large surface area, effectively used for high capacity energy storage. Graphene provides high power to electric cars, drones and other electric devices and is widely used in supercapacitors and battery construction. The advantages over other battery materials and increasing focus on R&D activities are the few factors responsible for growth of the market over the forecast period. Additionally, the advantages of Graphene batteries such as quick charging capacity, increased charge cycles, effectiveness in high temperatures, and extended duration to hold charge will also enhance the demand of this market. Furthermore, the introduction of products and other strategic alliance by various market players will create a lucrative demand for this market. For instance, according to company's news release on 04th February 2020, Graphenano Nanotechnologies with its partner Chint, launched batteries made with a graphene polymer which are used in electric vehicles, it would allow an autonomy of 800 kilometers, as well as occupies between 20 and 30% less than a lithium battery and could be charged in just 5 minutes. The manufacturing and energy power sectors throughout the world facing challenges due to COVID-19 pandemic situation. The collapse of various manufactures as well as distributors due to COVID-19, impacting the growth of Graphene batteries market. However, incapability of

mass production is the major factor restraining the growth of global Graphene Battery market during the forecast period.

The regional analysis of global Graphene Battery market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world due to the increased demand for graphene batteries in this region.
