## **Abstracts**

Global Graphite Coatings Market is valued at approximately USD 0.6 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6.8% over the forecast period 2020-2027. Since the last few years, graphite coatings have gained wide popularity as an effective, viable, and high-quality alternative of traditional coatings for usage in various applications. These coating offers a range of benefits, such as clearance control to abrasible and abrasives, corrosion resistance, and better management of temperature. They often used for creating smooth surface, better strengthen & hardness, improved density, and low porosity to be used in an industrial sector. Also, the accumulation of methacrylate resin to graphite coating improves sealant capacity, whereas addition of antimony improves wear resistance, which may strengthen the growth of the overall market during the forecast period. Moreover, the rise in demand for nanomaterials following developments taken by nanotechnology, along with the increase in usage of graphene coatings in aerospace sector are the few factors responsible for the high CAGR of the market during the forecast period. According to the National Nanotechnology Initiative, the United States President's 2018 Budget provided USD 1.2 billion for the nanotechnology initiative in May 2017, aimed to support the innovation and research and development in the field of nanotechnology. Likewise, in 2018, the Ministry of Electronics and Information Technology (MeitY) has initiated the Indian Nanoelectronics Users Program (INUP). This program aims to provide access to nanofabrication facilities to undertake research and development in Nanoelectronics. This, in turn, is likely to strengthen the demand for graphite coatings, thereby contributing to the market growth around the world. However, the severe health

hazards associated with inhalation of graphite coatings is one of the prime the few factors restraining the market growth over the forecast period of 2020-2027.

The regional analysis of the global Graphite Coatings market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market share owing to the booming automotive and aerospace sector to implement graphite coatings, along with the wide presence of market vendors in the region. Whereas Asia-Pacific is anticipated to exhibit the highest growth rate / CAGR over the forecast period 2020-2027. Factors such as the rise in production of nanotechnology-based products and couple with rise in utility of graphite coating in electric vehicles' batteries across developing nation, such as China and India creating a lucrative opportunity for the growth of the Graphite Coatings market in the Asia-Pacific region.
