However, lack of skilled professionals and impact of COVID-19 on construction impedes the growth of the market over the forecast period of 2021-2027. Also, Declining cost of raw material in the green buildings and increase in the demand of insulation is likely to increase the growth of the market in the forecasting period.

The regional analysis of global Green building materials market when considering for various key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World leads to the analysis that North America is the significant region owing to market share, across the world in terms of market share owing to increasing demand of construction in the region Whereas, Asia Pacific is anticipated to exhibit highest growth rate over the forecast period 2021-2027. Factors such as increasing awareness of government towards saving environment would create lucrative growth prospects for the green building materials market across Asia-Pacific region.
