## **Abstracts**

Global Green Cement Market is valued approximately at USD 18.9 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 13.6% over the forecast period 2021-2027. Green Cement is an environment-friendly product which is made using industrial wastes such as power plant wastes, mining and burnt clay etc. It helps in minimizing the carbon footprint of cement production. The growth drivers for green cement market is low requirement of natural resources and use of less water in the construction process. It also helps in reducing carbon emission during the process of manufacturing the cement. For instance, Ekkomaxx cement is a type of green cement manufactured by Ceratech Company which is composed of 95% fly ash and 5% liquid additives which has zero carbon footprint. However, less awareness among the people for using green cement is a restraint for the market. Introduction of innovative product development and new flavors by manufacturers are expected to open up new opportunities to the market.

By region, the market for global microcontroller is segmented into key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is expected to dominate the market because the government of the region introduced strict rules and regulations regarding the GHG emissions. Asia Pacific is also expected to grow at a high rate owing to the rapid urbanization in the region.
