Abstracts

Global Haptoglobin Reagent Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Haptoglobin reagents are used for haptoglobin protein measurements. These are used in the diagnosis of haemolytic anaemia and to separate it from different types of anaemia. Growing number of hematology testing procedures and increasing global prevalence of anaemia are driving the growth of Haptoglobin Reagent Market. For instance, according to Statista – In 2018, the global hematology testing market was estimated at USD 4.5 billion. It is projected to reach to USD 8.2 billion by 2029. Furthermore, according to the Centers for Disease Control and Prevention, as of 2021, around 3 million people in the United States are suffering from anemia. Also, growing senile population worldwide and rising healthcare sector are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, lack of demand from developing economies due to minimal incidence of Haemolytic anemia impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Haptoglobin Reagent Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to increasing number of hematology testing procedure and presence of leading market players. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as rising healthcare infrastructure and growing

number of geriatric populations in the region, would create lucrative growth prospects for the Haptoglobin Reagent Market across the Asia Pacific region.
