Abstracts

Global Health Check-up Market is valued at approximately USD 48.71 billion in 2022 and is anticipated to grow with a healthy growth rate of more than 5.3% over the forecast period 2023-2030. Health checkups typically involve a range of tests and assessments, including physical examinations, blood tests, imaging scans, and screenings for specific conditions such as cardiovascular diseases, cancer, diabetes, and so on. These examinations offered by healthcare providers, hospitals, diagnostic centers, or specialized health checkup clinics. The market growth is driven by key factors such as the increasing Prevalence of Diseases, the adoption of Digital Technology and the growing Geriatric Population.

Regular health checkups are seen as an effective means to detect potential health risks early, enabling individuals to make informed decisions about lifestyle changes, seek appropriate medical care, and improve overall health outcomes. For instance, as per

Statista, in 2020, certain digital medical technologies were widely adopted in Europe's medical community, while others saw relatively little use. For instance, electronic health records were frequently used by European clinicians to provide care. 81% of European doctors said they utilized electronic health records. The second-most common method of prescribing was using digital technology. However, fewer than one in ten of the clinicians who responded said they used robots, genetic information, radio frequency identification tags, artificial intelligence, or virtual reality. Furthermore, A national programme for the early diagnosis of hypertension was started in May 2023 by the Ministry of Health and Prevention (MoHAP) UAE. UAE aims to decrease the prevalence of high blood pressure by 30% by 2030. The worldwide market is driven mostly by the growth of government agency recommendations. However, High Cost Associated with Screening stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Health Check-up Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America is leading the global market share of the Health Check-up Market owing to increasing healthcare coverage. However, APAC is expected to be the fastest-growing region due to increasing government initiatives to improve healthcare services owing to an increased incidence of communicable and non-communicable diseases.
