## **Abstracts**

Global Healthcare Finance Solutions Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Healthcare finance solutions is a type of financial capital solution that helps in managing finance and risk to achieve the financial goals in a healthcare sector. These solutions offer more efficient capital flow and facilitate the collection and financing of healthcare-related services. The surging demand for hi-tech equipment and technology in the healthcare sector, rising incidences of chronic diseases, coupled with the growing geriatric population are fueling the market demand across the globe. For instance, as per the United Nations, in 2019, it is estimated that there are nearly 703 million persons aged 65 years or over globally and the figure is anticipated to get double and reach 1.5 billion by the year 2050. Accordingly, the rapidly growing population is more prone to get affected by a wide range of acute and chronic diseases, which, in turn, exhibit a positive influence on the global market growth. However, the continuously changing regulatory environment and lack of awareness among the population impede the growth of the market over the forecast period of 2022-2028. Also, the rising demand for various digital finance solutions and growing spending on technological developments are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Healthcare Finance Solutions Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing demand for advanced healthcare systems, along with the rising presence of a large number of leading market players such as Commerce Bancshares, Inc., Siemens Financial Services, Inc., and others. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the increasing expenditure on the healthcare finance solution, as well as the emergence of novel technologies, would create lucrative growth prospects for the Healthcare Finance Solutions Market across the Asia-Pacific region.
