Abstracts

Global Healthcare provider network management Market is valued approximately USD 2.9 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 14.9 % over the forecast period 2021-2027. Healthcare provider network management is a data management software which helps hospitals and health care systems, to contracting services, and credentialing pricing maintenance and configuration that centralize and manage provider information that resides within a provider data repository. Health care credentialing software can be used in tandem with or be offered as a module within PDM software. In-house shortage of skilled personnel, increasing population and investment in digital health industry has led the adoption of healthcare provider network management across the forecast period. The expanding customer base and rising need to cut down operational & administrative costs has prompted payers to move towards provider network management. For Instance: as per the US health care the 2020 digital health market was valued somewhere between \$96.5 and \$111.4 billion. However, IT infrastructural constraints in developing countries impedes the growth of the market over the forecast period of 2021-2027. Also, the increasing advanced data analytics, is likely to increase the market growth during the forecast period.

Global Healthcare provider network management Market is segmented on the basis of geographical reason as Asia Pacific, North America, Europe, Latin America and Rest of

the World. North America led the market and witnessed robust growth owing to growing IT sector and technological advancement. Whereas, Asia-Pacific is coming up as one of the promising regions as huge market growth is observed due to factors such as rising disposable income, rising population, growing health infrastructure would create profitable growth prospects for the Healthcare provider network management Market across Asia-Pacific region.
