Global Heat Pump Water Heater Market is valued approximately at USD 1.3 billion in 2019 and is anticipated to grow with a growth rate of more than 6.8 % over the forecast period 2020-2027. Heat pump water heaters move heat from one place to another via electricity instead of generating heat directly. This enables two to three times more energy efficiency than conventional electric resistance water heaters. The heat pumps work like a refrigerator in reverse, pulls heat from the surrounding air and dumps it at a higher temperature into a tank to heat water. The reduction in CO2 emissions and governmental incentives and regulations to enhance energy efficiency are the few factors responsible for growth of the market over the forecast period. Moreover, the rising focus on the use of renewable energy to check climate change and environmental degradation will further drive the market. Furthermore, the introduction of products and services as well as other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 11th October 2018, Panasonic Corporation has started residential air to water heat pump production at Panasonic AVC Networks Czech, s.r.o. (PAVCCZ) in Pilsen, Czech Republic to enhance its air conditioning business in European market. Also, on 15th March 2019, Panasonic Corporation agreed into a partnership with Systemair, Swedish ventilation company to launch heat pump chiller series. This partnership will develop and meet the higher level of environment demands and also provides long term business prospectus in European Market. Whereas, lack of awareness regarding benefits of heat pump water heaters in

developing and underdeveloped countries is the major factor restraining the growth of global Heat Pump Water Heater market during the forecast period.

The regional analysis of global Heat Pump Water Heater market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world owing to the increase in the use of renewable energy and energy efficient products. Also, various leading players in the heat pump water heater market such as A.O. Smith Corporation, Midea Group, RHEEM Manufacturing, and Mitsubishi Electric have their manufacturing facilities in countries such as China, India, and Thailand.
