Abstracts

Global High Impact Corrugated Box Market is valued at approximately USD 66.99 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 3 % over the forecast period 2022-2028. High Impact Corrugated Box, are formed of hollow-on-the-inside sheets that are significantly lighter than standard plastic, plywood, or metal sheets, making them easier to pack and transport. Rigidity and durability, rising demand to carry heavier products, strong and cost-effective design, and rising expansion of facilities by key players to increase production capacity have driven the adoption of High Impact Corrugated Boxes across the projected period. Fluted arches provide cushioning and support for weighted materials arranged in a corrugated box in the middle layer, which is sandwiched between the outer and inner layers. Over 200 years have passed since the invention of the typical cardboard box. In the middle of the first industrial revolution, flutes were added to High Impact corrugation. Since its invention, the corrugated box has evolved into the most prevalent type of shipping container, with applications in every facet of material management and transportation. For Instance: Given the reports of February 2022, WestRock, a paper packaging manufacturer based in the United States, will construct a new corrugated box plant in Longview, Washington. Because of the growing market need for eco-friendly packaging solutions in the Pacific Northwest, the sustainable packaging provider has opted to develop the plant. Every industry segment will be served by the new corrugated facility. Also, rising demand from end-users and rising number of online stores are most likely to boost the overall growth of the High Impact Corrugated Box market. However, failure of storage and transportation of liquid products and rising environmental regulations regarding cutting of trees intended for the manufacturing of paper can obstruct the market's

expansion over the projection period of 2022-2028.

The key regions considered for the global High Impact Corrugated Box market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world. Rising demand for durable and cost effective packaging options is driving the market growth in the region. Asia Pacific specifically India is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. The market is expected to grow during the projected period, due to rising trade activities and growing demand for safe secondary packaging.
