## **Abstracts**

Global High Performance Plastics Market is valued at approximately USD 22.86 billion in 2022 and is anticipated to grow with a healthy growth rate of more than 9.20% over the forecast period 2023-2030. The Global High-Performance Plastics Market refers to the market for specialized polymers that exhibit exceptional mechanical, thermal, and chemical properties. These high-performance plastics are designed to operate under extreme conditions, such as high temperature, high pressure, and corrosive environment. The major driving factors for the Global High Performance Plastics Market are the growing demand for electric and hybrid vehicles and the growing demand for high-performance plastics in the packaging industry. Moreover, advancements in material technology and an increasing focus on sustainability is creating a lucrative growth opportunity for the market over the forecast period 2023-2030.

Growing demand for electric and hybrid vehicles, which require high-performance plastics to reduce weight and improve fuel efficiency. According to a report by the International Energy Agency, the global electric car fleet exceeded 10 million vehicles in 2020 and is expected to reach 145 million by 2030. Furthermore, in March 2021, General Motors announced that it would increase its investment in electric vehicles to USD 35 billion by 2025, and launch 30 new electric vehicles globally by the end of 2025. Similarly, in June 2021, Ford announced that it would increase its investment in electric

vehicles to USD 30 billion by 2025 and that electric vehicles would make up 40% of its global sales by 2030. However, the high cost of High Performance Plastics stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global High Performance Plastics Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America region is a significant contributor to the High Performance Plastics market due to the presence of major end-use industries such as aerospace, automotive, and electronics. The increasing demand for lightweight and durable materials in these industries is expected to drive market growth in the region. Asia Pacific region is expected to witness significant growth in the High Performance Plastics market due to the increasing demand from end-use industries such as automotive, electronics, and construction. The growing population, rising disposable income, and increasing urbanization are expected to drive the demand for high-performance plastics in the region.

Recent Developments in the Market:

In October 2022, Arkema announced the launch of a new series of recycled High Performance Polyamides (HPP) called Virtucycle, which are manufactured at their custom recycling center in Italy. The Virtucycle program uses partially or fully recycled Rilsamid polyamide 12, Pebax polymers, and Rilsan polyamide 11 to produce high-performance polyamides.

In July 2022, BASF launched the PuriCycle portfolio, which includes advanced high-performance adsorbents and catalysts for the purification of complex waste plastics pyrolysis feeds. These products are designed to enable plastic recycling and help address the global issue of plastic waste.
