## **Abstracts**

Global Hull & Machinery Insurance Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Hull & Machinery Insurance is a type of marine ocean insurance that provides protection against physical damage and loss of property for a vessel, including the hull, machinery, and equipment by the Peril of the Sea. Hull and Machinery insurance covers a wide range of vessels including ships, tankers, bulk carriers, dredgers, trawlers, fishing boats, pontoons, yachts, cruises and jetties and wharves. This type of insurance does not cover damage caused by wear and tear, or deterioration due to weathering, insects, and animals. The increasing global maritime trade and availability of comprehensive coverage & flexible plans as well as strategic initiatives from leading market players are key factors accelerating the market growth.

The rapid expansion of marine trade worldwide is contributing to the growth of the market over the forecast period. For instance, as per UNCTAD's Global Trade Update February 2022 report – in fourth quarter of 2021, the global trade in goods increased by almost USD 200 billion to reach USD 5.8 trillion. Moreover, in the same period trade in services increased by USD 50 billion to reach about USD 1.6 trillion. Furthermore, as

per UNCTAD's Review of Maritime Transport Report 2021 – as of 2020, more than 80% of the volume of international trade in goods worldwide is carried by sea, and the percentage is even higher for most developing countries. Also, growing emergence of digital insurance distribution platforms and rising expansion of international trade in post covid era would create a lucrative growth prospectus for the market over the forecast period. However, premium cost & stringent claims procedure stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Hull & Machinery Insurance Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region in terms of market share owing to presence of leading market players and rising expansion of maritime trade in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising penetration of leading market players and growing emergence of online insurance distribution platforms in the region.
