Abstracts

Global Hyaluronic Acid Market is valued at approximately USD XXXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2022-2028. Hyaluronic Acid is major component for the connective tissue, by forming a gelatinous matrix that surrounds cells. It is majorly used in moisturizing creams, lotions and ointments and serums. Thus, growing geriatric population and rising preference for minimally invasive procedures are factors contributing to the market growth. For instance: according to United Nations, the global aged population over and above 65+ years of age is expected to go to 1.5 billion people, by the year end 2050 from 703 million people, in the year 2019. However, variations in the prices and presence of alternatives impede the growth of the market over the forecast period of 2022-2028. Also, technological advancements and favorable government initiatives are likely to increase the growth of the market in the forecasting period.

The regional analysis of global Hyaluronic Acid market includes Asia Pacific, North America, Europe, Latin America and Rest of the World for analysis and estimation. North America is the leading region across the world in terms of market share owing to rising cosmetic surgeries.
