## **Abstracts**

Global Hydration Backpack Market is valued approximately at USD 388.74 million in 2020 and is anticipated to grow with a healthy growth rate of more than 12.4% over the forecast period 2021-2027. Hydration packs are specialized backpacks comprising of in-built water bladder system, generally used by hikers, bikers and soldiers to carry water easily without taking up space and allow free movement. Growing participation of consumers in activities such as cycling, hiking and running is driving the market. Also, features such as temperature regulation which makes it suitable to use in both winter and summer season are affecting the product demand positively. For instance, according to Outdoor Industry, in April, May and June of 2020 the number of day hikers rose by 8.4 percentage points, as compared to the corresponding period in 2019. Furthermore, technological advancements are expected to boost the demand in coming years. However, lack of awareness for using hydration backpacks in place of water bottles in emerging economies may hinder the market growth during forecast period.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global Hydration Backpack Market. Asia Pacific is the dominating region across the world in terms of market share due to increasing use of hydration packs due to rising number of sports personnel. Whereas Asia Pacific is also anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to favorable government policies and increasing disposable income of the population.
