Global Hydrocolloids Market is valued approximately at USD 9.2 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 5.3% over the forecast period 2020-2027. Hydrocolloids are obtained from different synthetic and natural sources such as microbes, plants, animals, seaweed, and synthetic chemicals and are used as emulsifiers, stabilizers, and thickeners. Hydrocolloids are used in wide range of end-user industries including personal care, food & beverage, oil & gas, pharmaceuticals, and agriculture. The surging demand for healthy and natural ingredients in various food & beverages application and demand for bakery and confectionery products, dairy products, beverages, frozen desserts, and pet food are the few factors responsible for growth of the market over the forecast period. Furthermore, the introduction of products and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 12th February 2019, Ingredient extends texture capabilities with single hydrocolloids to expand company's specialty product portfolio. It includes the gum-based texturizers that offer

texture stability, emulsification and protein protection, to customers across Europe, the Middle East and Africa. However, stringent international quality standards and regulations and shortage of resources has created a demand-supply imbalance is the major factor restraining the growth of global Hydrocolloids market during the forecast period.

The regional analysis of global Hydrocolloids market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world owing to the large market for bakery, confectionery, convenience food, and packaged food products. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
