Global Hydrostatic Transmission Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Hydrostatic transmission drive is a type of transmission that is often used on heavy equipment. In hydrostatic transmissions oil pressure is used to power hydraulic motors. Growing logistics and transportation industry and rising construction sector are key drivers for the growth of Hydrostatic Transmission market. For instance, according to The Bureau of Transportation Statistics (BTS)- in USA, as of October 2021, USD 117.4 billion of transborder freight moved by all modes of transportation, which is 15.1% higher as compared to total freight moved in October 2020 and 9.6% higher as compared to USD 107.1 billion in October 2019. Also, as per India Brand Equity Forum- India plans to spend USD 1.4 trillion on infrastructure projects through the National Infrastructure Pipeline (NIP), from 2019 to 2023, to ensure sustainable development in the country. Also, with the surging infrastructure development in emerging economies, the adoption & demand for Hydrostatic Transmission is likely to increase the market growth during the forecast period. However, supply chain disruption due to covid 19 pandemic impede the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Hydrostatic Transmission market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World.
