Abstracts

Global Hydroxyapatite (HAp) Market is valued at approximately USD xx billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Hydroxyapatite (HAp) is basically a calcium phosphate found as a primary material of teeth, bones, and minerals. It promotes osseointegration between bone and orthopedic implants. Its contents enhance the structural and functional connection of bones due to its properties. The Hydroxyapatite (HAp) Market is estimated to grow with the increasing dental care industry and plastic surgery across the globe in the forecast period. According to the World Health Organization 2022, in 2019, oral diseases are majorly affecting a large number of populations across the globe. Around 3.5 billion people are affected by oral diseases worldwide. Additionally, according to the World Bank in 2019, around 16.6 % of the total population in the United States above 65 age is affected by oral diseases. The rising demand for medical implants is another major factor boosting the market growth. Whereas, growing hydroxyapatite application in oral care and rising spending and innovations in healthcare industry creates lucrative market growth. However, increasing popularity of bioresorbable composites impedes market growth over the forecast period of 2022-2028.

The key regions considered for the global Hydroxyapatite (HAp) market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is dominating the market owing to the factors such as rising cases of oral disorders, rising incidences of plastic surgeries, etc. Whereas Asia Pacific is projected

to grow with the highest CAGR in the coming years owing to the rising healthcare investment and growing public awareness.
