## **Abstracts**

Global Hyperloop technology Market is valued approximately at USD 1.2 million in 2020 and is anticipated to grow with a healthy growth rate of more than 40.4% over the forecast period 2021-2027. Hyperloop is a network which provide high-speed, intercity surface transportation system, which uses pod or capsule-like vehicle operating in a fibered vacuum tube with reduction in pressure and minimized air resistance or friction. Less expensive and minimum infrastructural maintenance, creation of hyperloop network requires less land area and tolerance to earthquakes and other natural calamities are the factors which are driving the growth of Hyperloop technology market. Furthermore, Reduction in travelling-related expenses and need for urban decongestion will be anticipating the growth of market in forecasted period. For instance: in November 2020, Virgin hyperloop became the first company to perform test of its hyperloop technology with passengers. The run was on 500 meters from Las Vegas with speed of 100mph inside an enclosed tube. In October 2018, the first hyper looped capsule for passenger was unveiled in Spain by HyperloopTT Inc. However, safety and security concerns and lack of awareness regarding hyperloop transportation technology may impede market growth over the forecast period of 2021-2027.

Global Hyperloop technology market analysis on basis of region which includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the significant region across the world in terms of market share due to major key players

for Hyperloop technology in in the region. Whereas Asia Pacific is anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to presence of a few evolved economies such as India, China, Australia or Japan and the population crisis leading to crowded streets of Hyperloop technology in the region.
