## **Abstracts**

Global Hypoparathyroidism Treatment Market is valued at approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Hypoparathyroidism Treatment is a treatment in which a low level of parathyroid hormone is produced by hypoparathyroidism. Parathyroid hormone maintains and regulates the balance between calcium and phosphorus. Increasing number of thoracic surgeries and incidence of cancer, new drug development and government support have led to the adoption of Hypoparathyroidism Treatment across the forecast period. For Instance: as per the National Cancer Institute in 2020, an estimated 1,806,590 new cases of cancer will be diagnosed in the United States and 606,520 people will die from the disease. Also, with the increasing adoption of technologically advanced treatment, the adoption & demand for Hypoparathyroidism Treatment is likely to increase the market growth during the forecast period. However, lengthy clinical approval cycles impede the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Hypoparathyroidism Treatment market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to increasing thyroid-related diseases and increasing initiatives by pharmaceutical organizations to generate novel formulations. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as the presence of generic manufacturers would create lucrative growth prospects for the Hypoparathyroidism Treatment market across Asia-Pacific region.
