Abstracts

Global ICU Beds Market is valued at approximately USD XX million in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. ICU beds are meant to help hospitals with infection control, work efficacy, comfort, safety, and convenience of use, as well as effective risk management. They come with accessories including a section mattress base, an X-ray cassette holder, and stepless pneumatic adjustment for trendlenburg and anti-trendlenburg, all of which are designed to help healthcare workers operate more efficiently. The ICU beds market is primarily boosted by an increase in surgical procedures, an increase in the geriatric population, and an increase in the occurrences of chronic diseases such as diabetes, asthma, blood pressure, and others. Furthermore, the market is expected to develop because of technical advances in ICU beds and increased government and private sector investments in healthcare infrastructure throughout the forecast period. Furthermore, an increase in the number of hospitals with well-equipped and advanced infrastructure, an increase in the number of surgical procedures, Will boost the demand for ICU beds. The World Health Organization (WHO) declared the COVID-19 outbreak a public health emergency of worldwide significance on January 30, 2020. Around 210 countries have been affected by COVID-19. The COVID-19 pandemic is a once-in-a-generation global public health crisis that is expected to boost demand for ICU beds. The rapid surge in confirmed COVID-19 cases is encouraging the intensive care community in the healthcare business to prepare for the problems that this pandemic will bring. In the ICU, patients with severe cases of COVID-19 require about 14 days of respiratory assistance. As a result, the increase of COVID-19 patients will augment the

growth of the ICU beds market over the projection period. However, low demand in underdeveloped countries may impede market growth over the forecast period of 2021-2027.

The regional analysis of the Global ICU Beds Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World (ROW). North America is the leading region across the world in terms of market share due to increasing healthcare spending in the region. Whereas Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to enhanced investments from governments for overall R&D of ICU beds across the region.
