## Abstracts

Global Imaging Services Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Imaging service is a procedure that is used to identify and diagnose a wide range of chronic and infectious diseases. This imaging service helps to form images of various parts of the human body, for a better understanding of the patient's health status and enables healthcare professionals for giving proper treatment. The increasing number of outpatient settings with imaging services, raising awareness of medical imaging, coupled with the growing prevalence of cancer and cardiac disorders are several prominent factors impelling the global market demand. For instance, as per the World Cancer Research Fund International, in 2021, nearly 19.3 million new cancer cases were registered and this figure is projected to increase to 24 million by 2035. Therefore, the rising incidences of cancer are fueling the demand for imaging services, which, in turn, accelerates the market growth across the globe. However, the high cost of MRI services and side effects of imaging modalities impede the growth of the market over the forecast period of 2022-2028. Also, the growing adoption of artificial intelligence and blockchain in diagnostic imaging settings and increasing initiatives by various healthcare services about the diagnostic imaging services are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Imaging Services Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the

increasing technological developments, along with the presence of a huge patient pool. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the advancing healthcare infrastructure facilities, as well as growing investments in diagnostic imaging, would create lucrative growth prospects for the Imaging Services Market across the Asia-Pacific region.
