## **Abstracts**

Global In-Store Analytics Market is valued approximately USD 1.68 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 23.5% over the forecast period 2021-2027. In-Store Analytics refers to the process of gaining meaningful insights of data from the customers' behavioral attributes. This data gives the information ranging from demographics to age to gender of the customer. This information, after being processed, helps provide the consumers, retailers and buyers an enhanced shopping experience and optimized store layout for the same. Increasing need towards better customer service and increasing shopping experience and maintenance of huge data volumes are factors contributing to the market growth. For instance, according to the U.S Census Bureau, the United States' retail sales went up by 0.3% in January 2020, thus, with an increase in the sales in the retail store there was an increase in the data volume to be recorded systematically. Thus in order to have a free flow of customer's database there leads an increasing demand of the Analytics. However, lack of skilled professionals impedes the growth of the market over the forecast period of 2021-2027. Also, increasing awareness towards optimizing store performance is likely to increase the growth of the market in the forecasting period.

The regional analysis of global In-Store Analytics market when considering for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World has led to the analysis that North America is a significant region across the world in terms of market share owing to rapid adoption of in-store analytics solutions coupled with established developed countries in the region Whereas, Europe is anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as increased technological improvements coupled with research and development initiatives by the firms would create lucrative growth prospects for the In-Store Analytics market across Asia-Pacific region.
