## **Abstracts**

Global Incident and Emergency Management Market is valued approximately USD 97.00 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 5.50 % over the forecast period 2020-2027. Incident and emergency management refers to a standardized approach, which manages and prevent incidents or emergencies that have severe outcomes. Also, the incident and emergency management deals with all humanitarian aspects for emergencies that include response, preparedness and recovery and aims to reduce the harmful effect of all hazards that includes disasters. The growth of the market is witnessed due to the rise in incidences of natural disasters resulting due to the changing climatic conditions, terrorist and bio-hazardous attacks along with the stringent government regulations. For Instance: as per the data published by Statista in 2018, around 8093 terrorist attacks were recorded in 2018 worldwide which was around 6771 in 2012. Thus, with the necessity of emergency preparedness, the demand and adoption of incident and emergency management solutions would increase thereby, reinforcing the growth of the

market during the forecast period of 2020-2027. However, false alarm rate is hampering the growth of this market. Further, technological advancements in communication infrastructure would also create lucrative growth aspects for the global market during the forecast period.

The regional analysis of global Incident and Emergency Management market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region due to the rising adoption of incident and emergency management solutions and services. Also, in countries such as the US and Canada, there is a high focus on innovations obtained from Research and Development (R&D) and technology. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
