Abstracts

Global Industrial Coupling Market is valued approximately USD 2.46 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.1% over the forecast period 2022-2029. Industrial couplings can perform a variety of tasks, including disconnecting the moving engine or motor from the driven machinery or a pump. To ensure proper functioning of the system, industrial couplings and shafts should be positioned correctly. The Industrial Coupling market is expanding because of factors such as growing demand from the mining industries and rising adoption of electric vehicles.

Industrial couplings are also used to provide angular relative axial motion, minimize, or prevent vibration transfer from one machine component to another, and enable minor equipment misalignment. Its prevalence has progressively increased during the last few decades. According to the Statista, in 2021 the top 40 mining companies account for a total revenue of approximately USD 925 billion. Glencore was the world's leading mining company in terms of revenue as of 2021. Furthermore, China was by far the world's leading mining country in terms of mineral production value in 2020, with over 217 billion US dollars in metallic mineral and coal production value reported. The United States was ranked third, accounting for nearly \$55 billion in mineral production value during that period. Another important component driving space increase is adoption of electric vehicles. According to Statista, the global electric vehicle market is expected to more than quadruple between 2021 and 2027, expected to reach about global market size of USD 1.4 trillion by 2027. In addition, in 2021, China had the highest electric

vehicle adoption rate in the Asia-Pacific region, with more than 16% of all new passenger vehicles sold being EVs. Also, increasing demand for industrial couplings in the energy sector and growing demand from the chemical industries would create a lucrative growth prospectus for the market over the forecast period. However, the high initial cost of Industrial Coupling stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Industrial Coupling Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia Pacific dominated the market in terms of revenue, owing to the increasing mining output and China and Australia are two of the four largest mining nations in the world. According to the Statista, in 2021 China accounts highest mine production rate of rare earths in the Asia-Pacific region of about 168 thousand metric tonnes of rare-earth oxide, followed by Myanmar with approximately 26 thousand metric tonnes of REO production in 2021. North America is expected to grow with a highest CAGR during the forecast period, owing to factors such as increasing demand for industrial coupling from various end-use sectors, including food and beverage and pharmaceuticals in the market space.

Major market player included in this report are:

Altra Industrial Motion Corp.
Daido Precision Industries Ltd.
Emerson Electric Co.
Dandong Colossus Group Co., Ltd.
