Global Industrial Gases- Metals & Metal Fabrication Market is valued approximately USD 49.92 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.07% over the forecast period 2022-2028.

Industrial gases are the gaseous materials that are available in both liquid and gaseous phases, in which the gaseous phase is the most common highly demanded across various industries. These gases are supplied in a variety of different cylinders according to the properties of the gas such as some gases are delivered at low pressures while others are at high pressures. Additionally, metal fabrication involves a variety of activities from general welding to highly specialized laser welding processes. Accordingly, industrial gases for metals & metal fabrication play a significant role in

numerous industrial owing to they are environment friendly and cost-effective. The prominent factors such as the growth of the metal and manufacturing industry, increasing demand for automotive and heavy machinery, and rapid industrialization are accelerating the market growth across the globe. For instance, as per India Brand Equity Foundation (IBFE), In 2018, the manufacturing sector was accounted for USD 390.84 billion in India and it is projected to reach USD 395.89 by 2019. However, stringent rules and regulations impede the growth of the market over the forecast period of 2022-2028. Also, rising application in various end-use industries is anticipated to act as a catalyzing factor for the market demand during the forecast period.
