## **Abstracts**

Global Industrial and Commercial Floor Scrubbers Market is valued approximately at USD 3.61 billion in 2022 and is anticipated to grow with a healthy growth rate of more than 9.5% over the forecast period 2023-2030. Industrial and commercial floor scrubbers are specialized cleaning machines designed for efficient and thorough floor maintenance in large-scale settings. These robust and often automated devices cater to the needs of diverse industries and commercial spaces, ranging from manufacturing plants and warehouses to shopping malls and healthcare facilities. Equipped with advanced features such as brushes, squeegees, and powerful suction capabilities, floor scrubbers effectively remove dirt, grime, and contaminants from various floor surfaces. The Industrial and Commercial Floor Scrubbers market is expanding because of factors such as expansion in the construction industry, growth in the manufacturing sector and expanding retail and hospitality sectors.

The expansion in the construction industry has emerged as a significant driver for the growth of the industrial and commercial floor scrubbers market. As construction activities surge globally, there is a parallel need for efficient and large-scale cleaning solutions in the newly built structures. Industrial and commercial floor scrubbers play a vital role in maintaining the cleanliness and safety of expansive construction sites, warehouses, and newly completed facilities. According to Statista, the worldwide Construction industry spending in year 2019, stood at USD 12 trillion which increased to

USD 12.9 trillion in the year 2021 and it is projected to reach USD 19.2 trillion by the year 2035.
