Global Industrial Noise Control Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Industrial noise control products refer to acoustic products and solutions that are used to control and reduce industrial noise. Some of the widely used noise control devices are Industrial fan silencers, industrial exhaust silencers, acoustic blankets among others. Growing mining & construction sector and rising technological advancements in industries are key drivers for the growth of Industrial Noise Control market. For instance, according to India Brand Equity Forum (IBEF)- In FY21, Iron ore production in India estimated at 189 million tonnes and as per projections, in FY22, iron ore exports reached USD 2.23 billion, registering an increase of 21.8% YoY basis and as per Oxford Economics- Global construction output in 2020 was USD10.7 trillion and it is expected to grow by 42% or USD 4.5 trillion from 2020 to 2030 to reach USD 15.2 trillion. Furthermore, in June 2021 Sound Seal, US based manufacturer of noise control products has launched BioCore Acoustical Wall Panels. Also, with rising industrial automation and surging government regulations and policies to control industrial noise, the adoption & demand for Industrial Noise Control is likely to increase the market growth during the forecast period. However, corrosive nature of Industrial Noise Control impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Industrial Noise Control Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading market players and growing infrastructure development in the region.
