Abstracts

Global Industrial Refrigeration Systems Market is valued approximately USD 19.55 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 4.6 % over the forecast period 2020-2027. Factors such as rising purchase of packaging products, increase in consumption of perishable products and government initiatives for strengthening cold chain infrastructure are few factors expected to fuel the market demand. For instance: in 2020, the government of India approved 27 new integrated cold chain projects, with an investment of \$67.1 million (INR 743 crore), for integrated cold chain and value addition infrastructure development program. Also, investment made by market players for equipment testing is also expected to drive the market demand. For example; in 2020, Danfoss Editron inaugurated a new in-house testing laboratory in Lappeenranta, Finland. However, high installation costs and high energy consumption impedes the growth of the market over the forecast period of 2020-2027. Also other factors such as, increasing number of refrigerated warehouses and the increasing penetration of organized retail stores in emerging economies like India, China are likely to increase the market growth during the forecast period.

. Asia Pacific, Europe, North America, Latin America and rest of the World is considered in the regional analysis of global industrial refrigeration system. North America is the leading region across the world in terms of market share owing to the aggressive and convenient marketing of frozen food products in the number of varieties such as bowl

meals, skillets and others. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2020-2027. Factors such as rapid growth opportunities observed from cold-chain storage infrastructure in various countries such as India, Japan, and China would create lucrative growth prospects for the Industrial Refrigeration Systems market across Asia-Pacific region.
