## **Abstracts**

Global Industrial Vacuum Cleaner Market is valued at approximately USD 594.37 million in 2021 and is anticipated to grow with a healthy growth rate of more than 4.88% over the forecast period 2022-2028.

The Industrial Vacuum Cleaner is a device that is designed to perform heavy cleaning operations and vacuum the small and large quantities of dry & wet waste, in both commercial and industrial environments. These cleaners are available in several types such as single- or three-phase motors, which are preferred for intermittent vacuum to continuous vacuum. The execution of the stringent government regulations regarding health & hygiene, and safety across various verticals, the adoption of technological vacuuming solutions, tied with the introduction of advanced and innovative products by the leading players are the factors that are surging the demand for Industrial Vacuum Cleaners across the globe. For instance, in September 2019, Model 1050, a continuous-duty industrial vacuum cleaning system was launched by the VAC-U-MAX, which is designed to vacuum high-density materials. However, a high machinery cost and heavy structure of vacuums impede the growth of the market over the forecast period of 2022-2028. Also, demand for Industrial Vacuum Cleaners from emerging economies is anticipated to act as a catalyzing factor for market growth during the forecast period.
