Abstracts

Global Industrial Vending Machine Market is valued approximately at USD 2.41 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 9.6% over the forecast period 2021-2027. Increasing demand for high-security industrial vending machines in data centers and rising adoption of vending machines by SMSEs enterprises are the factors which are driving the growth of Industrial Vending Machine market. Furthermore, digitization of supply chains in smart factories through use of industrial vending will be anticipating the growth of market in forecasted period. For instance: in April 2020, Fastenal Company acquired Apex Industrial Technologies, an automated point-of-use dispensing and supply chain company to promote a fast-growing sales channel of industrial vending machines. This strategy will help them to strengthen the position in global market. However, high investments are needed in the installation of industrial vending machines which may impede market growth over the forecast period of 2021-2027.
