Abstracts

Global Industrial Water Treatment Chemicals Market is valued approximately USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2021-2027. The water treatment chemicals are primarily used in water distillation, raw-water and effluent-water treatment plants, cooling & boilers and many more. In order to fulfill the needs and wants of the growing population, an ultimate increase in the demand for treating the impure water will increase in the forecast period. Industrial and commercial developments and increasing demand of freshwater and resources worldwide are factors contributing to the market growth. For instance, according to Statista, the consumption of water worldwide is projected to rise to 1565 billion cubic meters by 2025 and 1720 billion cubic meters by the year 2040 from 1405 billion cubic meters, in the year 2014. Thus, with an increase in consumption, there will be an ultimate increase in the demand for industrial water treatment chemicals in the near future. However, high maintenance, material and process costs involved and lack of skilled professionals for treating the dirty or unhealthy water impedes the growth of the market over the forecast period of 2021-2027. Also, rapid urbanization and technological advancements is likely to increase the growth of the market in the forecasting period.

The regional analysis of global Industrial Water Treatment Chemicals market includes Asia Pacific, North America, Europe, Latin America and Rest of the World for analysis and estimation, North America is a significant region in terms of largest market share across the world owing to changing climatic conditions. Whereas, Asia Pacific is anticipated to exhibit the highest growth rate over the forecast period 2021-2027.

Factors such as increasing demand for fresh water coupled with increasing demand from the industrial and commercial sector would create lucrative growth prospects for the Industrial Water Treatment Chemicals market across Asia Pacific region.
