Abstracts

Global Infant Fever Sticker Market is valued at approximately USD 440.37 million in 2021 and is anticipated to grow with a healthy growth rate of more than 9.0 % over the forecast period 2022-2028. Infant Fever Stickers are stickers that you apply to your child's forehead and which display a temperature reading. It keeps track of the various temperatures and lists them all so you can receive not only a reading of the temperature but also a history of it. The latex-free mild adhesive allows the stickers to stay in place for up to 48 hours and can be simply applied to the arm, chest, or forehead. These stickers are waterproof and guaranteed to be within 1 degree Fahrenheit of the actual temperature. User friendly and convenient to use, rising demand for latex free and hypoallergenic stickers, and rising adoption of Internet of Things (IoT) have driven the adoption of Infant Fever Stickers across the projected period. For Instance: As per the reports, by 2025, the total installed base of Internet of Things (IoT) connected devices is estimated to reach 30.9 billion units, a significant increase from the 13.8 billion units expected in 2021. Also, rising investment in the healthcare sector and rising concerns of parents are most likely to boost the overall growth of the Infant Fever Sticker market. However, lack of availability and lack of awareness about the product can obstruct the market's expansion over the projection period of 2022-2028.

The key regions considered for the global Infant Fever Sticker market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world. Rising awareness about infant fever stickers is driving the market growth in North America. Whereas, Asia Pacific is also anticipated to

exhibit the highest growth rate over the forecast period 2022-2028. The market is expected to grow during the projected period, due to rising population and availability of Merchandise.
