## Abstracts

Global Infection Control Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Infection control stops or prevents the spread of infections in healthcare settings. The infections are basically caused by bacteria, fungi, viruses, stomach and intestinal infections, eye infections, ear infections, etc. These infections can be controlled by sterilization, cleaning and disinfection products, and protective barriers, endoscope reprocessing products, etc. Increasing incidences of chronic disorders are likely to enhance the market growth in the forecast period. According to the American College of Cardiology in 2019, the number of cardiovascular diseases is incessantly growing. Approximately one-third of the total deaths are caused by cardiovascular disease. In 2019, there were around 523 million new cases. Cardiovascular diseases are estimated to increase rapidly in the coming years due to growing aging population. Growing geriatric population is another major factor boosting the market growth. Whereas, rising incidence of hospital-acquired infections and favorable initiatives by market players create lucrative opportunities for the market. However, threat of the adverse effects of chemical disinfections impedes the growth of the market over the forecast period.

The key regions considered for the global Infection Control market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia Pacific is

projected as the leading region across the world in terms of huge market share due to the increasing incidences of hospital acquired infections, rising adoption of sterilization and disinfection equipment, etc.

Whereas, Asia-Pacific is also estimated to attain a maximum growth rate during the forecast period. Factors such as rising threat of infections, growing geriatric population, and increasing R&D activities would create beneficial growth forecasts for the Infection Control market across Asia-Pacific region.
